Summary

A Full Stack Web Developer with expertise in building dynamic, user-centric web applications and responsive designs, ensuring on-time project delivery. Passionate Instructor adept at simplifying complex concepts and fostering collaborative learning. Committed to continuous growth and staying ahead of industry trends.

Experience

Digital African Design Studio (DADS) - D-TALK Startup   Nov 2024 - Present
Full-stack Developer   remote

- Developed responsive, high-performance web applications using **Next.js**, implementing modern **React**-based frameworks for optimal user experiences.
- Translated detailed UX/UI designs into clean, maintainable, and scalable frontend code, ensuring seamless responsiveness across devices.
- Prioritized accessibility and cross-browser compatibility to deliver inclusive and user-friendly digital solutions.

Freelance Web Developer   Jun 2022 - Present

- Developed numerous web applications using React.js, Express.js, Node.js, and TailwindCSS for responsive design.
- Managed full project lifecycle: requirements gathering, planning, design, development, and deployment.
- Communicated directly with clients through in-person and online meetings, ensuring clear understanding and alignment on project objectives and deliverables.

NGB Professionnelle   Jul 2024 - Oct 2024
Full Stack Development Instructor   Remote

- Instructed and mentored students in full-stack and mobile development using the MERN stack
- Led hands-on coding sessions, updating course materials to align with industry standards.
- Supported students in building mobile-friendly applications and received positive feedback for fostering a collaborative learning environment.
- Developed and delivered a curriculum that included:
  - **Node.js & Express.js:** Robust back-end development.
  - **MySQL with Docker Compose:** Efficient database management.
  - **Prisma ORM:** Effective database interactions.
  - **React with Tailwind CSS:** Modern, responsive front-end design.
  - **API Testing with Postman:** Ensured reliable back-end functionality.
  - **Deployment on Vercel:** Real-world application deployment experience.
  - **Version Control with Git & GitHub:** Facilitated collaboration and project management through version control practices.

Skills

Frontend	Backend	DataBase
reactjs, html, css, TailwindCSS	springboot, expressjs, nodejs, nestjs, PrismaORM	SQL, NoSQL

FullStack	Tools & Technologie	
symfony, NextJs	Docker, Git, Github	

Education

Higher Institute of Technological Studies of Béja   2021 - 2024
Bachelor's Dgree Higher Institute of Technological Studies of Béja

- Specialized in the design, development, and optimization of web and mobile applications.
- Completed various projects focusing on advanced development techniques and professional growth.
